

Boral sets global sector-leading emissions reduction targets and commits to net zero

Boral has set the most ambitious emissions reduction targets in the global construction materials industry¹, and has joined the Science Based Targets initiative (SBTi) *Business Ambition for 1.5°C* and UNFCCC *Race to Zero*.

The new carbon reduction targets mean Boral is committed to net-zero emissions by no later than 2050, aligned with the most ambitious aim of the Paris Agreement to limit global warming to 1.5°C.

Boral's 2030 targets, which it is seeking to be validated by SBTi, are a:

- 46 per cent reduction in absolute Scope 1 and 2 emissions, and
-
